

Circular saw blades "cordless cut wood", professional quality, for semi-stationary circular saws

- Maximum runtime for cordless saws thanks to extra thin steel blade thickness and cutting width
- Significantly more cuts per battery pack charge compared to standard saw blades with the same long tool life
- Particularly long tool life thanks to best carbide quality and finely-ground teeth
- Precise, low-noise and vibration-minimised cuts thanks to lasered expansion slots (and partially laser ornaments) as well as lasered steel blades made from sintered steel
- Secondary holder for circular saw blades with Ø 216
