

Glue sticks, 130°

- Low melt glue stick with low processing temperature of 130°C (270°F) for working with temperature-sensitive materials
- For gluing heat-sensitive materials such as Styropor®, PU-foam, hard PVC, nylon, polyester, rubber etc.
- Solvent-free and can be removed without residue using hot air
- For hot glue guns with low processing temperature, e.g. Metabo cordless hot glue gun HK 18 LTX 20
