

Semicircular carbide burrs, RBF shape "professional premium"

- Carbide burrs with universal serration and innovative coating for general applications
- Up to 100 percent more material removal than for comparable carbide router bits with cross-cut serration
- Longer service life thanks to innovative coating
- Thanks to special universal serration it can be used in many different materials.
- Application examples: Deburring, machining of contours, processing of surfaces, milling of hard to reach places, machining of narrow angles
